Champion's Quote - Heritage AG International

A new, exciting Champion has joined the DBM Catalyst, Heritage AG International. Heritage AG and a federation of infrastructure enterprises are executing a project to develop and deliver 15,000 housing units near Accra, Ghana. Heritage AG owns 1,800 acres of land near Accra. A portion (800 acres) has been allocated for the development of the 15,000 housing units in various categories which have already been allocated for occupation for private families via a unique government contract.

New Accra, Ghana Model

Supporting the New Accra families is a highly advanced Smart City complex consisting of a K12 school, hotel resort with casino, 500 bed hospital, retail amenities, a STEM focused university, parks and other greenspaces. This project is grown from a green field approach; a blank slate of 1800 acres to produce a vibrant, resilient smart community that will change the face of Ghana.

Leveraging TM Forum's Collaboration Catalyst Program, the Digital Business Marketplace partners have developed a digital platform capability which provides

for traditional companies, digital platform companies and hyperscalers to seamlessly partner in a frictionless ecosystem to deliver and in-life manage secure, zero touch, industry 4.0 solutions for complex customer requirements.

The DBM partners rapid and exciting progress has prompted Heritage AG International to join the Catalyst and pledge to engage with virtually all of the DBM capabilities, including the Secure Supply Chain and Smart Grid operations. The Ghana project will benefit from a greater choice of secure solutions, an ecosystem of partners, lower cost, and a better experience from solutions that meet their exacting needs as this massive project matures to eventually be a model for hundreds of similar projects throughout Africa that will greatly improve the quality of life for millions of its population.
